

Fish Eyes Activity Card

Dear Families - Young children are beginning to develop an understanding of numbers. Fish Eyes makes use of a small green fish on each of the counting pages to introduce children to the idea of addition -- *1 more* ("plus me"). With your child, cut out the small green fish at the bottom of this page. Help your child paste one in each box. Then, count all the fish in the box. Write the number of fish on the line in the box.
