

How Kittens Grow Activity Card

Dear Families - *How Kittens Grow* gives children a chance to learn how kittens grow from newborns into young cats. For this activity, you and your child will need to cut the pictures from the bottom of the page. Read the captions in the boxes to your child. Together, paste the pictures in the boxes where they belong.

Kittens suck milk from their mother.	Kittens sleep a lot.	Kittens play with anything they find.
Kittens drink from saucers.	Kittens lick their paws.	Kittens learn to hunt for food.
