

## **Behavioral Science Intervention Designer**

The University of Virginia's EdPolicyWorks seeks a Behavioral Science Intervention Designer to join our team. The Behavioral Science Intervention Designer assists the primary investigator with overall study design, particularly diagnosing behavioral obstacles that interventions should address and leading the design process to yield behaviorally-informed interventions and products. The incumbent is also responsible for researching and learning emerging technologies for use in research studies, leading data collection from intervention partners, including both administrative data and survey data; identifying and implementing project changes as necessary; and conducting data analysis. Duties also include supervising research staff, serving as the day-to-day contact for internal and external stakeholders, working with senior researchers to identify funding opportunities, assisting with writing grant proposals, and collaborating with senior researchers to disseminate findings through publication and presentation.

A bachelor's degree in education, public policy, decision sciences, economics, psychology, or a related field is required, as are a minimum nine years' designing behavioral science interventions and conducting applied behavioral science research. A master's degree or terminal degree is preferred and may substitute for experience. Experience managing social science research projects and creating project protocol, including creation of intervention tools and data collection methods, is preferred. Advanced knowledge of behavioral science, decision science, and applied behavioral science intervention design is required. Excellent written, verbal, and interpersonal communication skills are essential, as is the ability to interact effectively with a diverse group of internal and external constituencies and working as part of a team. The ability to maintain confidentiality and demonstrate good judgment is a must. Strong organizational skills, an attention to detail, and the ability to multi-task is also required. Knowledge of Microsoft Office (Excel, Outlook, PowerPoint and Word), use of the internet, and knowledge and the use of statistical research software such as Stata or SAS are required. Experience with design software is preferred.

To apply, visit <http://jobs.virginia.edu> and search on Posting Number 0620223. Complete an application online; attach a cover letter, and resume/curriculum vitae.

For questions about this position, please contact Ted Keefe at [twk7b@virginia.edu](mailto:twk7b@virginia.edu).

The Curry School of Education and the University of Virginia welcome applications from women, minorities, veterans and persons with disabilities; we seek to build a culturally diverse intellectual environment. We are Equal Opportunity/Affirmative Action employers.
